

K-Love has greatly impacted my community, because it has provided me with access to wonderful inspiring music, and bulletins on upcoming local events in my city. This network also provides news information from around the world. K-love has also reached people that are serving in our armed forces through the internet, and to other countries that do not have a local radio station. I hope that you understand the impact this station has on so many peoples lives, and I for one would be simply devastated if it was taken off the air. I hope that this won't happen. Thank you.
